

# fact·8<sup>®</sup>

Ultimate purity and elegance from the **fact**<sup>®</sup> range

Hi-Fi Choice  
WINNER  
2010

**fact·8**

Best Loudspeaker £2000+

"Top of the class"

**fact·8** in Rich walnut

The definition of *fact* - **noun** - a thing known to be true with complete certainty

PMC's vast knowledge of acoustic engineering gained from developing the world's leading professional loudspeakers has been distilled into the **fact**<sup>®</sup> range. Only this level of understanding of the creative process, room acoustics and supreme engineering make **fact**<sup>®</sup> possible.

With the phenomenal benefits of PMC's **ATL**<sup>™</sup> technology the **fact·8** floor-standing model produces the commanding power and scale that is capable of filling both medium and larger rooms with awe-inspiring dynamic sound.

With its compliment of twin **fact**<sup>®</sup> bass drivers and ultra high resolution **fact**<sup>®</sup> tweeter, they project an all encompassing, vivid sonic picture that can be experienced by all. These cutting edge precision drivers are seamlessly integrated with a highly sophisticated 24dB per octave crossover network and, in combination with the ultimately inert **ATL**<sup>™</sup> (Advanced Transmission Line) cabinet, create an entirely natural and refined balance where vocals hang in space and are truly tangible.
